

Cyber Essentials / Cyber Essentials Plus

In today's rapidly evolving cyber threat landscape, organisations face mounting challenges — from sophisticated phishing campaigns and ransomware attacks to insider threats and the increasing use of AI by cybercriminals to bypass defences. Staying ahead of these threats demands not only strong technologies but also trusted, proven security standards that build resilience, customer trust, and regulatory confidence.

That's where Ekco comes in. As a recognised IASME Certification body, Ekco delivers comprehensive Cyber Essentials and Cyber Essentials Plus assessments and certification services, helping organisations of all sizes achieve these critical government-backed certifications. These widely recognised standards demonstrate your commitment to protecting sensitive data, securing digital assets, and ensuring compliance with key industry and regulatory requirements.

With deep expertise, certified assessors, and a customer-focused approach, Ekco supports you at every stage of your Cyber Essentials journey — from initial readiness assessments and gap analysis to tailored remediation guidance, formal assessment, and successful certification. Our team ensures your organisation meets all five critical technical control areas, including secure configuration, boundary firewalls, access control, patch management, and malware protection, all while minimising disruption to your day-to-day operations.

By partnering with Ekco, you gain more than just a certificate — you gain a trusted security advisor dedicated to enhancing your cyber resilience, reducing risk exposure, and helping you confidently demonstrate security assurance to customers, partners, and regulators. Whether you're pursuing the foundational Cyber Essentials or the advanced, independently verified Cyber Essentials +, Ekco provides the clarity, expertise, and hands-on support you need to strengthen your security posture and stay one step ahead in today's hostile digital world.

“Cyber Essentials: Foundational Protection That Matters.”

Certified & Guided Assessment

As a registered IASME certification body, Ekco provides a guided, expert-led assessment process to help your organisation achieve Cyber Essentials certification. We simplify the journey, ensuring you meet all requirements with confidence and build a strong foundation for cyber resilience.

Extended Expertise

Ekco's deep cybersecurity expertise gives your organisation access to certified assessors and experienced security professionals who truly understand the Cyber Essentials framework. Our team goes beyond assessment — we help identify gaps, provide clear remediation advice, and strengthen baseline security controls. With Ekco's hands-on support, you gain valuable insights and the confidence to not only meet certification requirements but build stronger resilience against today's evolving cyber threats.

Peace of Mind

Achieving the government recognised Cyber Essentials Certification enhances your organisation's security posture by addressing key cyber risks and vulnerabilities. This trusted certification offers peace of mind, assuring customers and stakeholders that your business takes essential steps to protect data and systems from common cyber threats.
