

## Cyber Defence Complete

The cybersecurity threat landscape is constantly evolving, with cybercriminals becoming increasingly sophisticated in their tactics, techniques and procedures. Organisations of all sizes face a myriad of challenges, including advanced persistent threats, identity attacks, ransomware attacks, insider threats, and targeted phishing campaigns.

Attackers are leveraging emerging technologies such as artificial intelligence and machine learning to bypass traditional security measures, making threats more complex to deal with while they also grow in number. The ever-changing nature of the threat landscape makes it difficult for organisations to keep pace and adequately protect digital assets, data and infrastructure.

In this dynamic environment, the need for 24/7 defence for an organisation becomes crucial to ensure an organisation's cybersecurity resilience. Ekco's Cyber Defence Complete Service provides an organisation with multiple proactive defensive capabilities to enable them to Prepare, Identify, Detect and Respond to the ever-evolving cyber threat landscape while preventing security incidents before they escalate into full-blown breaches. Through Ekco's proactive approach to cybersecurity, organisations can minimise the impact of attacks, reduce downtime, and prevent significant financial and reputational damage.

Ekco's Cyber Defence Complete service is essential in helping protect and prepare your users and defend your digital landscape. Cyber criminals often exploit organisations and vulnerabilities outside of regular business hours, when many organisations' IT teams are off-duty. By having Ekco's Cyber Defence Complete Service in place, your organisation can effectively mitigate risks and stay one step ahead of cyber adversaries in this increasingly hostile digital landscape.

**“Threats don't sleep.  
Neither do we.  
Advanced threats need  
advanced cyber defence.”**

### 24/7 Complete Protection

Cybercriminals often exploit vulnerabilities outside regular business hours. Ekco's 24/7 Cyber Defence Complete service ensures continuous security coverage, protecting your users, systems and data from threats even when your internal IT teams are off-duty.

### Extended Expertise

Ekco's sophisticated Cyber Defence Complete service will give your organisation access to skilled cybersecurity professionals with extensive experience in cyber defence against the latest most prevalent threats and risks, enhancing your security capabilities and providing valuable insights to help navigate the complex threat landscape.

### Peace of Mind

Ekco's Cyber Defence Complete provides peace of mind for an organisation providing preparation, detection and response capabilities enhanced with SOAR, threat intelligence, security training and phishing simulation to enable a proactive approach to cyber defences. Our packaged offering helps organisations build a robust security posture, effectively mitigating risks in the ever-evolving threat landscape.

## Cyber Defence: Beyond Detection, Defence in Depth

Ekco is a leading provider of Global Security Operations Center (SOC) services, with SOC operations in the UK, Ireland, Netherlands and Malaysia. Our SOC services leverage the advanced features of our unified threat detection platforms to provide comprehensive proactive protection against cyber threats.

Our SOC is equipped with sophisticated technologies and is staffed by highly experienced cybersecurity analysts who possess the knowledge and skills to proactively detect, analyse, and respond to potential threats.

Our team can help businesses safeguard their critical assets by continuously monitoring their environment and users, identifying vulnerabilities, and providing guidance on how to mitigate risks. By partnering with Ekco for cyber security, our customers receive the highest quality cyber security expertise and services to protect their assets and reputation.

At Ekco, we understand that each organisation has unique security needs. That's why we offer tiered cybersecurity solutions designed to scale with your business. Our Standard and Premium packages build upon one another to provide a robust foundation of protection with the flexibility to expand services as your cyber maturity and resilience grow.

### Standard

Cyber Defence Complete provides a comprehensive package of defensive capabilities enabling a proactive stance against cyber threats.

#### 24x7 MXDR Monitoring

A 24x7 MXDR service with eyes on screen around the clock detection and response from experienced threat experts. Allowing you to focus on other important areas of your business.

#### Cyber Incident Response (CIR)

An expert Cyber Incident Response Team with retained hours. Ready to respond 24/7 when required to investigate, contain and eradicate threats.

#### Automation & Threat Intelligence

Integration to sophisticated SOAR platform leveraging leading AI capabilities with enriched Threat Intelligence feeds from Recorded Future providing near real time response and the latest information on evolving threats.

#### Real Time Threat Hunting

Diligent surveillance of telemetry data and SOC Threat intelligence unveils covert threats by analysing TTPs, unusual user behaviour, and network anomalies.

#### MXDR Dashboard

Gain actionable insights with our in-depth Ekco Shere MXDR Portal providing security insights and to drive strategic decision-making.

#### Insightful Reporting

Gain actionable insights with quarterly reporting packs providing security insights and governance.

### Premium

Our Premium service provides further enhancements enabling robust proactive capabilities towards achieving Cyber Resilience.

#### Enhanced Identity Monitoring

Enhanced Identity monitoring provided by Recorded Future to protect your business users from stolen identities and compromised credentials sourced across the dark web.

#### Defensive Automation

Customised and proactive SOAR playbooks and automations leveraging leading AI capabilities to provide automated defensive protection and blocking from evolving Cyber Threats.

#### Proactive Threat Hunting

Proactive and Automated Threat Hunting tailored to the business risk ensuring there is no place to hide providing a relentless pursuit of hidden risks.

#### Security Awareness Training

Market Leading Security Awareness training provided by KnowBe4 providing your users with the knowledge to help protect and defend the organisation from cyber risks and threats.

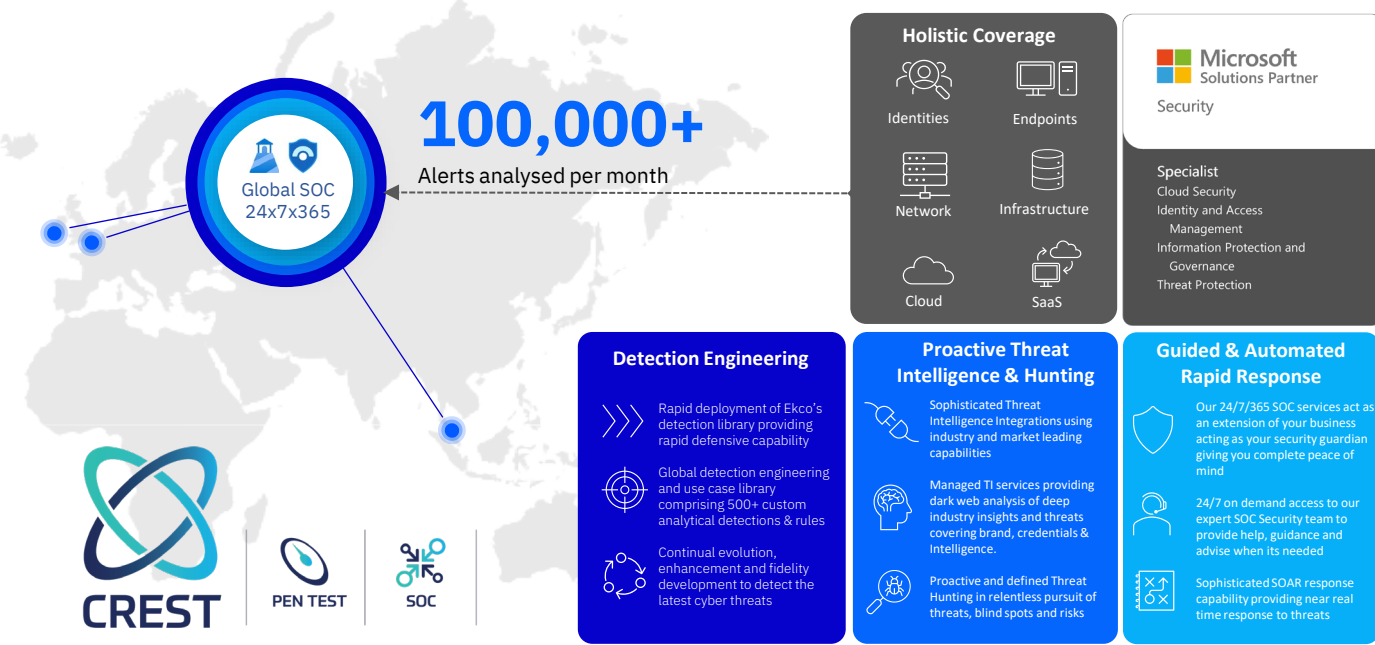

#### Defensive Phishing Simulation

An organisations users are the weakest link for cyber adversaries and a simple phishing email is all that's required to compromise your defences. Test your business users continually with the latest phishing protection from KnowBe4.

# Why Ekco Security Services?

### Next Generation Detection & Response

Ekco's Cyber Defence Complete service includes our leading MXDR Service making it easy to collect security data across your entire hybrid organisation from devices, users, apps, servers and any cloud. Our MXDR Service is scalable and uses the power of Tines SOAR Automation with Integrated Artificial Intelligence to ensure you are identifying real threats quickly. Our MXDR service eliminates the need to spend time on setting up, maintaining and scaling infrastructure.

### ATT&CK Alignment & Detection Maturity

Ekco's Cyber Defence Complete service is backed by our leading MXDR solution that comes complete with a vast library consisting of 500+ curated detections tested under real world and adversarial emulation mapped to attacker behaviors and the MITRE ATT&CK framework, an open globally accessible knowledge base of real-world adversary tactics and techniques and procedures. This ensures we have the best detection capability and documented operating procedures to eradicate threats effectively.

### Integration & Holistic Visibility

Our MXDR Service is designed for dynamic environments providing holistic visibility and integration capabilities. Our SOAR platform enables rapid identification of anomalous activity and has a vast library of integrations to any existing security tooling investments making data collection fast and scalable in any infrastructure, cloud or application.

### Threat Intelligence

Ekco's Cyber Defence Complete service harnesses market leading external threat intelligence provided by Recorded Futures to provide intelligence enrichment and enhanced external Identity Monitoring across the dark web. Our Threat Intelligence capabilities provide contextualization across events, alerts and Security Incident investigation activity providing a comprehensive view of real-world threats enabling us to respond and protect your organisation.

Ekco is one of Europe's leading managed cloud and cyber security service providers. We make it easier for you to innovate, scale, manage, troubleshoot and secure.

With a network of over 300 dedicated security specialists, we have the skills and experience to support your entire cyber security lifecycle. Our experts know the tools and methods used by the criminal underworld to successfully attack organisations across the globe. We know the strategies and technologies needed to protect you and your assets, and we have extensive knowledge on how to prepare and protect organisations from a crisis.
