MCTI - Managed Cyber Threat Intelligence

The cyber threat landscape is evolving at an unprecedented pace, with attackers continuously refining their tactics to bypass traditional security measures. Organisations of all sizes are now prime targets for ransomware, phishing attacks, and sophisticated breaches that exploit weaknesses in their brand, identities, users, and attack surfaces. As cybercriminals leverage artificial intelligence and automation, threats are becoming more targeted, stealthy, and difficult to detect. Without real-time threat intelligence and proactive defense, businesses risk financial losses, reputational damage, and operational disruptions.

Ekco's Cyber Threat Intelligence service offers continuous 24/7 monitoring of your brand, users, identities, vulnerabilities, and attack surfaces—delivering actionable insights that help your organisation anticipate and prevent cyber threats before they escalate into serious security incidents. By analysing cybercriminal behaviour, monitoring the dark web for leaked credentials, brand infringement and assessing vulnerabilities across the attack surface, Ekco empowers security teams to stay steps ahead of adversaries by giving a cyber attackers viewpoint. Our intelligence-driven approach enhances detection and response capabilities, minimises downtime, and strengthens overall cybersecurity resilience.

With cyber threats operating around the clock, real-time cyber threat intelligence is no longer optional—it's essential. Ekco's expertise, combined with cutting-edge technology and strategic partnerships with industry leaders, ensures organisations receive the intelligence and protection they need to defend against evolving threats. Stay ahead of cybercriminals with Ekco's Cyber Threat Intelligence, providing the visibility and control required to safeguard your business in an increasingly hostile digital world.

"Stay one step ahead of attackers. Turn intelligence insight into cyber defence"

24/7 Threat Intelligence Monitoring

Cybercriminals often exploit vulnerabilities outside regular business hours. Ekco's 24/7 MCTI service ensures continuous security monitoring, protecting your systems and data from threats even when your internal IT teams are off-duty.

Extended Expertise

Ekco's sophisticated MCTI service will give your organisation access to skilled cybersecurity professionals with extensive experience in Cyber Threat Intelligence and response, enabling you to enhance your organisations security posture and capabilities whilst providing valuable risk-based insights to help navigate the complex threat landscape.

Peace of Mind

Ekco's Microsoft MCTI service provides 24/7 eyes on screen monitoring and real-time analysis to give an attackers view of your organisation, helping to detect and identify potential threats before they escalate into severe security incidents. By employing a proactive approach and staying up-to-date with the latest threat intelligence, our services help organisations build a robust security posture, effectively mitigating risks in the ever-evolving threat landscape.

Managed Cyber Threat Intelligence: Staying One Step Ahead of Attackers

Ekco is a leading provider of Global Security Operations Center (SOC) services, with SOC operations in the UK, Ireland, the Netherlands and Malaysia. Our SOC and Threat Intelligence services leverage the advanced features of our unified threat intelligence and detection platforms to provide comprehensive and proactive protection against cyber threats.

Our Threat Intelligence function is equipped with sophisticated technologies and is staffed by highly experienced Intelligence experts who possess the knowledge and skills to proactively detect, analyse, and respond to potential threats.

Our team can help businesses safeguard their critical assets by continuously monitoring their environment, brand, users, services and vulnerabilities, and providing guidance on how to mitigate Cyber Intelligence risks. By partnering with Ekco for cyber security, our customers receive the highest quality cyber security expertise and services to protect their assets and reputation.

At Ekco, we understand that each organisation has unique security needs. That's why we offer tiered cybersecurity solutions designed to scale with your business. Our Essentials, Standard and Premium offerings build upon one another to provide a robust foundation of protection with the flexibility to expand services as your cyber maturity and resilience grow.

MCTI Service Capabilities

Proactive Cyber Threat Intelligence services powered by leading technologies to provide customisable offerings that allow your organisation to stay one step ahead of Cyber Attackers.

24x7 MCTI Monitoring

A 24x7 MCTI service with eyes on screen around the clock providing detection and response with experienced threat intelligence experts. Allowing you to focus on other important areas of your business.

Brand Intelligence

Leveraging industry-leading Intelligence tools to protect your brand reputation, digital assets, and intellectual property from cyber threats, fraud, and misuse.

Identity Intelligence

Using industry-leading intelligence tools to deliver protection, detection, and response capabilities that safeguard your organisation's digital identities from identity theft and credential compromise.

Vulnerability Intelligence

Advanced Intelligence tools provide continuous monitoring of your organisation to identify vulnerabilities, zero-day exploits, and emerging threats.

Attack Surface Intelligence

Sophisticated intelligence tools enable continuous monitoring of your organisation's exposed digital assets and attack surface, providing real-time visibility to help identify, assess, and remediate risks before threat actors can exploit them.

Third Party Intelligence

Powerful intelligence tools provide continuous monitoring of your organisation's exposed digital assets and attack surface, delivering real-time visibility to support proactive risk identification and mitigation.

Weekly TI Digest

Weekly Threat Intelligence digest providing industry intelligence information and insights into cyber threats, vulnerabilities, emerging risks and attack trends to aid your organisation in staying ahead of the cyber adversaries.

Threat Intelligence Bulletin

Proactive Threat Intelligence bulletin notifications surrounding global and geo-political events that influence the cyber threat landscape. Understanding the political, social and economic landscape is crucial for predicating potential cyber threats.

Flash Notifications

A rapid response to global critical vulnerabilities, emerging threats and zero-day exploits that could present potential risks to your organisation.

Annual Intelligence Review

Annual Threat Intelligence workshop and in-depth annual report providing actionable insights around your organisation and industry verticals.

Analyst on Demand

An intelligence expert when you need it the most, on demand to provide expertise, advice, guidance and support.

Sophisticated Reporting

Gain actionable insights with regular scheduled reporting packs providing cyber threat intelligence insights and governance.

Why Ekco MCTI Service?

Ekco is a leading provider of Global Security Operations Center (SOC) and Intelligence services, with SOC operations in the UK, Ireland the Netherlands and Malaysia. Our SOC and Threat intelligence services leverage the advanced features of our unified threat detection and response capabilities bolstered by the application of our sophisticated Threat Intelligence Platform (TIP).

Our Cyber Threat Intelligence team are equipped with sophisticated technologies and staffed by highly experienced cybersecurity Intelligence experts who possess the knowledge and skills to proactively detect, analyse, and respond to potential threats. We have flexible Intelligence service packages covering Essential, Standard and Premium Service levels that can align to your business needs and budgets whilst providing sophisticated capability to aid your cyber maturity and cyber resilience journey.
