

Cyber Defense Complete

Enabling Rapid Detection and Response of Cyber Events and Breaches

Combat Evolving Cyber Threats with Proactive Defense and Response

Customers face rising cyber threats that bypass traditional defences, increasing risk operational strain. Cyber Defence Complete provides 24/7 detection, investigation and response, empowering teams to stay ahead of threats and enhance security.

Primary Challenges

All organisations encounter challenges such as limited threat detection, visibility gaps, delayed incident reporting, poor attack preparedness, insufficient internal expertise, and underutilized existing security investments.

Ideal solution

Cyber Defence Complete unifies threat detection, investigation, and response across endpoints, networks, and cloud environments. With 24/7 major incident support & automated workflows, it enhances security and reduces incident impact.

Desired outcomes

Gain a sophisticated threat intelligence led detection and near real time response capability. Protecting your organisation against the latest industry threats with a next generation detection, alerting and response capability.

End-to-End Protection & Response

Ekco delivers comprehensive threat detection, automated response, integrated threat intelligence, and includes major incident response, all backed by the CREST-certified SOC for robust security, detection and rapid remediation.

Threat Detection using Microsoft Defender

Enhance threat detection with Microsoft Defender, providing real-time insights and proactive defence.

Threat Detection using Microsoft Defender

Automate responses with MXDR to quickly neutralize threats and minimize impact across your environment.

Threat Detection using Microsoft Defender

Leverage MS XDR in Business Premium, E5, or Defender P2 to maximize the value of your existing licenses

COMBAT EVOLVING CYBER THREATS WITH PROACTIVE DEFENSE AND RESPONSE

Created for mid-sized and SME organizations, the Ekco Cyber Defence Complete service offers top-tier detection and response cyber capabilities from Ekco, leveraging a leading SOC. Ekco delivers a worldwide detection and response solution centered on Microsoft XDR, enabling intelligent threat response on a large scale.

Threat Intelligence Detection

Best in class threat detection capabilities using intelligence led detection & near real time response capabilities using ML/AI capabilities

Automated Response

Ekco SOAR provides integrated automation & orchestration delivering near real-time threat mitigation & remediation. We can mitigate on your behalf.

Data Driven Security Services

We provide a security metrics portal which stands over our service. This empowers our customer and provides visibility to your key stakeholders.

Customer success: Driving Cyber Resilience and Value with Managed XDR

Partnering with Ekco enabled the University of Galway to respond effectively to a serious cybersecurity incident and significantly strengthen its long-term security posture. Following an incident in 2021, Ekco supported the University through full incident response activities, identifying compromised devices and services, containing and eradicating threats, and supporting recovery, before transitioning the organisation to a proactive, managed security model designed to reduce future risk and improve resilience.

Rapid incident response

Ekco supported the University of Galway following a cybersecurity incident in 2021, delivering incident response services to identify compromised systems, contain and eradicate threats, and support recovery.

Stops threats for us

Ekco implemented a 24x7 Managed Security Service through its SOC, enabling continuous monitoring across on-premise, cloud, and endpoint environments, with automated triage and rapid escalation of high-priority events.

Trusted Partner

Ekco is your trusted partner for robust cybersecurity, delivering expert-managed detection and response to keep your business secure and resilient.

Secure Your Business with Cyber Defence Complete – Proactive Protection, Rapid Response
