

Security Awareness Training & Phishing

Your Greatest Cyber Risk Isn't a Virus. It's a Click.

Sophisticated phishing and social engineering targets your employees every day. Traditional training often fails to stick, leaving organisations vulnerable and open to data breaches and cyberattacks.

Ekco transforms your employees into informed, vigilant defenders. Through engaging, tailored training that embeds security awareness into everyday behaviour.

What we do

- **Assess & Plan:** We analyse your unique risk profile and define clear goals.
- **Engage & Train:** Roll out tailored, engaging training modules to your team.
- **Simulation & Test:** Reinforce learning with safe, simulated phishing attacks.
- **Report & Refine:** We provide clear reports on progress and continuously improve your program.

Why teams choose Ekco

Ekco's programmes are designed to materially reduce the likelihood of successful cyber-attacks by improving employee behaviour. Training helps staff identify phishing, poor cyber hygiene, and social-engineering attempts, addressing the root cause of 33% of security breaches.

Ekco delivers its training and phishing simulations using the KnowBe4 platform, — the global standard for security awareness.

This ensures:

- High-quality, engaging eLearning
- Continuous phishing simulations
- Real-time reporting
- Large content catalogues and automation features

What we offer

Phishing Simulations: Simulated phishing attacks to evaluate employees' vulnerability to phishing emails by mimicking real world scenarios. Equipping employees to recognise and prevent phishing attempts

New Employee Onboarding: ensures new hires are equipped with essential cyber security knowledge and skills during onboarding.

Awareness Training: provides interactive and captivating training modules aimed at educating employees on a wide array of cybersecurity threats, industry best practices, and essential compliance obligations.

Security Policy Reinforcement: strategically reinforces organisational security policies and procedures through focused training initiatives.

About Ekco

Ekco is a European leader in managed cloud and cyber security.

We help organisations innovate and scale securely while protecting their people, data, and systems.

With over 300 security specialists, we support the full cyber security lifecycle, combining deep knowledge of real-world attack methods with proven strategies to strengthen security awareness and defend against threats such as phishing.

Security Awareness Training & Phishing as a Service from Ekco

- **Interactive Modules:** Engage employees with dynamic content, including videos, quizzes, and simulations to reinforce learning and retention.
- **Phishing Simulations:** Simulate real-world phishing attacks to assess employees' susceptibility and provide targeted training based on the results.
- **Customisable Content:** Tailor training programs to align with your organisation's unique security policies, industry regulations, and specific threat landscape.
- **Progress Tracking:** Monitor employee participation and performance with detailed analytics and reporting dashboards.
- **Expert Support:** Access to a team of cybersecurity experts who provide guidance, support, and additional resources to enhance the effectiveness of your training initiatives.
- **Flexible Delivery Options:** Choose from a variety of delivery methods, including online courses, instructor-led sessions, and mobile-friendly modules, to accommodate diverse learning preferences and schedules.
